EXAMINER

MEHRPOUR, NAGHMEH

ART UNIT	PAPER NUMBER
----------	--------------

2686

DATE MAILED: 07/26/2005

Please find below and/or attached an Office communication concerning this application or proceeding.

**Office Action Summary**

Application No.

10/672,621

Applicant(s)

CASPI ET AL.

Examiner

Naghmeh Mehrpour

Art Unit

2686

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☐ Responsive to communication(s) filed on \_\_\_\_.
- 2a) ☐ This action is **FINAL**.                      2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

**Disposition of Claims**

- 4) ☒ Claim(s) 1-16 is/are pending in the application.
- 4a) Of the above claim(s) \_\_\_\_ is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_ is/are allowed.
- 6) ☒ Claim(s) 1-16 is/are rejected.
- 7) ☐ Claim(s) \_\_\_\_ is/are objected to.
- 8) ☐ Claim(s) \_\_\_\_ are subject to restriction and/or election requirement.

**Application Papers**

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on \_\_\_\_ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).  
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

**Priority under 35 U.S.C. § 119**

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All    b) ☐ Some \*    c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

\* See the attached detailed Office action for a list of the certified copies not received.

**Attachment(s)**

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☒ Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08)  
Paper No(s)/Mail Date 09/26/03.
- 4) ☐ Interview Summary (PTO-413)  
Paper No(s)/Mail Date. \_\_\_\_.
- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other: \_\_\_\_.

## DETAILED ACTION

### Information Disclosure Statement

1. The information disclosure statement filed reference listed in the information Disclosure Submitted on 09/26/03 have been considered by the examiner (see attached PTO-1449)

### *Claim Rejections - 35 USC § 102*

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. **Claims 1-16**, are rejected under 35 U.S.C. 102(e) as being anticipated by Murray (US patent Number 6,484,033 B2).

Regarding claim 1, Murray teaches a telecommunications system, comprising:

a plurality of network clients including a positioning controller and a communications controller (col 1 lines 7-10); and

a positioning server including a coordinating controller (col 6 lines 31-43) for maintaining a database of network clients to be tracked and provide

Art Unit: 2686

updates of position-related information to a presence server (col 4 lines 60-67, col 5 lines 1-9);

wherein said plurality of network clients are configured to transmit position information received via said positioning controller to said positioning server via said communications controller, said positioning information including information related to a speed of movement (col 6 lines 15-31).

Regarding claim 2, Murray inherently teaches a telecommunications system in accordance with claim 1, wherein said plurality of network clients are configured to associate a particular speed with being in a car (col .

Regarding claim 3, Murray teaches a telecommunications system in accordance with claim 2, wherein said communications controller is adapted to transmit a position update to said positioning server upon detection of a predetermined speed (col 6 lines 21-60).

Regarding claim 4, Murray teaches a telecommunications system in accordance with claim 3, wherein said speed is correlated with a hysteresis threshold (col 6 lines 43-61).

Regarding claim 5, Murray teaches a telecommunications system in accordance with claim 4, wherein said position signals comprise global positioning system signals (col 6 lines 43-61).

Art Unit: 2686

Regarding claim 6, Murray teaches a telecommunications system in accordance with claim 5, wherein said communications controller is a cellular telephone controller (col 7 lines 52-65).

Regarding claim 7, Murray teaches a telecommunications device, comprising:

a positioning controller adapted to determine positioning information for said telecommunications device, said positioning information including device speed (col 4 lines 6067, col 5 lines 1-9);

a cellular telephone controller adapted to receive said positioning information from said positioning controller and cause said positioning information to be transmitted to an associated server (col 6 lines 15-31);  
and

a database controller for maintaining a database of position-presence correlation rules defining when said positioning information is to be transmitted (col 6 lines 21-60).

Regarding claim 8, Murray teaches a telecommunications device as recited in claim 7, wherein said positioning controller receives Global Positioning System (GPS) signals to determine said positioning information (col 6 lines 43-61).

Regarding claim 9, Murray teaches a telecommunications device as recited in claim 8, wherein said position-presence correlation rules include presence status associated with said device speed (col 6 lines 21-60).

Regarding claim 10, Murray teaches a telecommunications device as recited in claim 9, wherein said cellular telephone controller transmits changes to

Art Unit: 2686

location status to said associated server (col 4 lines 60-67, col 5 lines 1-21).

Regarding claim 11, Murray teaches a telecommunications device as recited in claim 10, wherein said cellular telephone controller is adapted to transmit a position update to said associated server upon a change of speed (col 6 lines 21-60).

Regarding claim 12, Murray teaches a telecommunications device in accordance with claim 11, wherein said cellular telephone controller is adapted to transmit said position update upon said change of speed only if said change of speed is correlated with a predefined position-presence correlation rule with a hysteresis threshold (col 6 lines 21-60).

Regarding claim 13, Murray teaches a telecommunications method, comprising:

- receiving one or more user positioning and presence correlation rules at a server, wherein positioning information is received from remote users having positioning controllers for receiving location information and communication controllers for transmitting said location information to said server via a wireless communication network (col 3 lines 10-53); and
- transmitting said one or more positioning and presence correlation rules to at least one of said remote users (col 3 lines 10-63);
- wherein said one or more positioning and presence correlation rules include a device speed (col 6 lines 21-60).

Regarding claim 14, Murray teaches a telecommunications method in accordance with claim 13, further comprising:

Art Unit: 2686

receiving positioning updates at said remote user 9col 3 lines 9-60);  
and

transmitting presence updates to said server as specified in said one  
or more positioning and presence correlation rules (col 5 lines 65-67, col 6  
lines 1-5).

Regarding claim 15, Murray teaches a telecommunications method in accordance  
with claim 14, wherein said device speed is associated with a hysteresis  
threshold (col 6 lines 20-60).

Regarding claim 16, a Murray teaches telecommunications system, comprising:

a plurality of network clients including a positioning controller and a  
communications controller (col 3 lines 10-60); and

a positioning server including a coordinating controller for  
maintaining a database of network clients to be tracked and provide updates  
of position-related information to a presence server 9col 3 lines 10-60);  
wherein said plurality of network clients are configured to transmit position  
information received via said positioning controller to said positioning  
server via said communications controller (col 5 lines 1055); and  
wherein one or more hysteresis thresholds are maintained (col 6 lines 20-60).

### **Conclusion**

4. The prior art made of record and not relied upon is considered pertinent to  
applicant's disclosure.

Mori (US Publication 2003/0130792 A1) disclose position measurement device terminal  
provided therewith, and position measurement method

Art Unit: 2686

**Moilanen** (US Publication 2003/0096622 A1) disclose location a wireless station

**Chern et al.** (US Publication 2003/0060211 A1) disclose location-based information retrieval system for wireless communication device

**5. Any responses to this action should be mailed to:**

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Naghmeh Mehrpour whose telephone number is 571-272-7913. The examiner can normally be reached on 8:00- 6:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Marsha Banks-Harold be reached (571) 272-7905.

The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
